
Let It Ride®

Let it Ride Poker has become a very popular casino game for several reasons. This particular game is based on poker hands, with which nearly everyone is familiar; players have a chance to win big jackpots; it incorporates strategy decisions that indulge in the player's desire for control; and it is easy to learn and fun to play. Let it Ride's unique structure allows bettors to actually take back some of the money they wager as the cards are being dealt.

THE OBJECT OF THE GAME

You are not playing against the dealer or the other players. You are simply trying to get a good poker hand by combining your three cards with the dealer's two down cards.

THE PLAY OF THE GAME

BETS: Each player places three equal bets as indicated:

THE DEAL: Each player receives three cards and two cards are placed face down in front of the dealer.

After looking at their first three cards, the player may ask for their first bet back or they may "Let It Ride."

One of the dealer's down cards is then turned up. This becomes the first community card. The player may then ask for their second bet back or "Let It Ride."

The dealer's second down card is turned up. This becomes the second community card and then the dealer turns the players' cards face up. The dealer then pays all winning hands according to the payout schedule.
